# SAFETY

Side Collision

Rear Collision

Lateral Static Pressure

Rollover Test

Our vehicle has gone through testings which comply with the US Regulation (FMVSS) & European Regulation (UNECE)

### Electronic type ABS:

ABS (Anti-lock Brake System) can protect the wheel being locked or slipped to ensure the valid braking under different ground conditions

### EBD (ELECTRONIC Brake force distribution):

It can detect, automatically, the load of front and back wheel, rotation differences, or wheel locking by electronic means, and distribute ideal brake forces at proper time.

### Monocoque type vehicle body:

1. High-strength swaybars
2. Buffer beams

### Dual Air Bag

The purpose of the airbag is to provide a vehicle occupant with soft cushioning and restraint during a collision. It can reduce injuries between the flailing occupant and the interior of the vehicle
